[REDACTED] RS-6 Low-Pass Filter

25X1

1. [REDACTED] has advised that [REDACTED] is conducting laboratory experiments aimed at the development of a low-pass R.F. output filter for use with the RS-6. We are interested in following the progress of this work rather closely, and would appreciate your forwarding a resume of the progress to date.

25X125X1

2. Further reports as the work progresses would also be useful at Headquarters, together with such samples of completed filters as may become available.
